We discussed this proposal during the last meeting and decided to sent it back based upon the following: The committee noted several additional modifications within the Actuarial Science Sequence, specifically the removal of MAT 460, MAT 470, MAT 473, and MAT 484 from the actuarial modeling elective list and the addition of MAT 443.

The Mathematics Chair provided the following and submitted a revision: "Thanks for sharing this context. I'll be honest, I have no idea why the actuarial science course list was changed (and I was the one who built it in Coursedog). I will edit it, to return it to the way it was, and return it to your committee.

The revision only reflects the changes to the title.

Beth moved to approve the proposal; Scott seconded. Approved unanimously.
